

I simply do not want the way the do not call list to change. There is peace of mind knowing you will not be bombarded with calls when you are home. If I am interested in something I will call myself. Harassing me at home is not acceptable. When they used to call I would tell them to give me their home phone number and when they got home I would call them back. The call usually ended there. Please do all you can to stop this change from happening.
